The Page Seed Co.

Chenango Valley Seed Gardens

Greene, - New York

SPECIAL NOTICE

To Our Friends:—

We have just passed the quarter century mark, and during this time, it has been our chief aim to supply to the dealer the very best seeds it is possible to grow or obtain. We believe we have, for the most part, at least, succeeded in this, for each year shows an increased output over the one before it, clearly demonstrating to us that Quality counts in the building of business.

Any success to which we have attained, we owe to our mutual friends, "Page's Standard Quality Seeds," the dealer, and the users.

With this as our foundation, we will continue to go forward.

Our Wholesale Price List

Our business is purely wholesale. We supply to dealers only. Prices in this list are those prevailing on the date of issue, and are subject to change without notice and to stock being unsold.

If large quantities are wanted, we will be pleased whenever possible to make special prices.

TERMS:—Unless otherwise noted, our terms are cash on June 1, 1922: Such accounts paid in 10 days from date of invoice are entitled to a special discount.

Onion Sets and Field Seeds, as Corn, Oats, Field Peas, Millets, Etc., are cash without discount.

Prices are for delivery f. o. b. Greene, N. Y. Necessary containers are charged at value. Cash or satisfactory references are required for unknown correspondents.

In common with all reputable seed firms, we offer and send out our seeds under the following non-warranty.

"We give no warranty, express or implied, as to the purity, description, quality, productiveness, or any other matter of any seeds we send out, and will not be in any way responsible for the crop."

---	------

PAGE'S HIGH-BRED CABBAGES

Special Note: On account of the importance of good cabbage seed for our trade, we conduct extensive, comparative trials of cabbages every year on our experiment farm. We not only test the choicest American strains, but also the best that Europe produces. Fortunately, the two most important countries for the production of high-grade cabbage seed. Denmark and Holland, have harvested fair crops. This puts us in splendid position to supply the choicest imported strains at moderate prices. Try **Copenhagen Market**, also **Enkhuizen Glory**. Both are **Winners**.

Earliest and Pointed Headed Sorts

Allhead Early —Flattened heads.....	\$ 1 60
Charleston or Large Wakefield	1 75
Copenhagen Market —Early round, solid heads	2 50
Early Flat Dutch —Large, solid heads..	1 50

Henderson's Early Summer —Compact, solid heads. Slightly flattened	1 50
Mammoth Red Rock —Late in maturing. solid heads	1 75
Premium Late Flat Dutch —Flat heads of uniformly large size	1 25
Succession —Good sort for home use or market. Large	1 60
Surehead —Large, thick, somewhat flat- tened heads. Always reliable	1 40

DANISH BALL HEAD—IMPORTED

We call especial attention to our imported strain of this variety.

Our stock is grown in an entirely isolated section on a small island off the coast of Denmark. This is the only variety of cabbage produced there.

We can contract with some growers for one-half the price we now pay. We will not take the chances of poor quality or mixed stocks.

For the protection of our customers we produce a crop of cabbage from this stock before placing with the dealer. This is testing for Purity.

If we knew of better stock, we would have it. We consider it as pure as any on the market. We believe in the best.

CARROTS**Danvers Half Long**

	Per lb
Chantenay— Stump rooted crisp orange flesh \$	40
Danver's Half-long — Most popular carrot. Grows good size ..	40

LEEK

Large American Flag —Plump stalks...	1.50
Broad London Flag —Best known.....	1 50

LETTUCE

On the following Page we list the standard varieties of Lettuce.

We draw especial attention to this leading market gardeners variety.

Big Boston.—Perhaps the most popular butterhead sort for early outdoor planting and a good one where soil and weather conditions are right. Under favorable circumstances the plants grow to be a foot in diameter and trimmed heads frequently weigh 10 ozs. or more. Of pleasing yellowish green color, edges of leaves decidedly

wavy and tinged with brownish red shades. Our stock of this is extra choice. We highly recommend it to market gardeners.

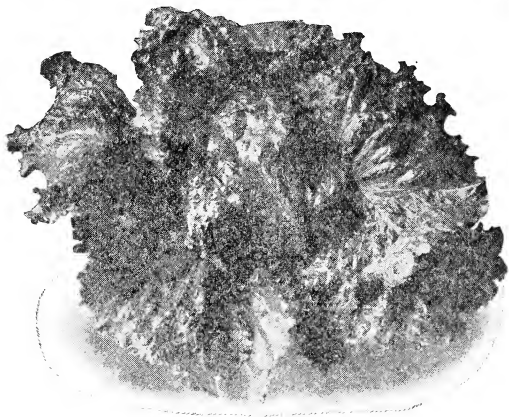

Lettuce Seed of choicest quality is one of our specialties. Our annual sales run into tons—ample testimony that dealers and planters everywhere value its dependability.

Loose-Leaved Varieties

	Per lb
Black Seeded Simpson —A standard sort	60
Boston Curled —Used for garnishing....	60

Mammoth Yellow

New York State Flint

Pennsylvania Flint

Sanford White Flint

By furnishng our customers the very highest grade of seed corn it is possible to grow or obtain, we have been able to build up a reputation that is so well established that we believe that we have the largest trade on strictly highbred Seed Corn of any eastern seedsmen.

We handle only selected stock. This stock is tested for vitality, moisture and purity. If the seed does not come up to our standard, it is rejected. Thus we come as near as we can to insuring our seed to produce a crop under the proper conditions.

Good Seed Corn cannot be sold cheaply, and it is poor economy to try to save on the price of seed corn. Buy the best. Buy for quality. Then and then only will the results be obtained that your customers desire. Talk quality, not price. We know there are cheaper corns on the market. But who knows what they will do? We know the farmer is endeavoring to save his seed. Sometimes a careful farmer gets results. The average farmer does not. They are the ones that buy the cheap seed. Talk quality first and then price.

On the next two pages are descriptions of some of our leading varieties.

CORN—Continued

WEST BRANCH

This variety is a fine corn for ensilage. It is sold under various names by seedsmen and dealers. It has yielded as high as 20 tons of ensilage to the acre. The ears are large, 10 to 12 inches long, about 8 inches in circumference, containing 12 to 20 rows of deep golden grain, sometimes white-capped, and sometimes having a decided reddish cast. Last season this corn was ready for the silo in August, and was ripe before the first hint of frost.

LUCE'S FAVORITE—NORTHERN GROWN

In response to repeated requests for a grade of Genuine Luce's Favorite corn that would mature earlier and not cost as much as the Long Island grown type, we have contracted and grown from seed stock from Long Island, our type of Northern Grown Luce's Favorite. It is just the same as the Long Island stock, except that it matures earlier and is better adapted for Northern points. It is one of the best, if not the best, for ensilage purposes.

EARLY EUREKA

In some sections Virginia Grown Eureka seems to be too late, so that there has been a demand for a large growing corn a little earlier. For a few years past there has been a good demand for this variety, which is at least 2 or 3 weeks earlier than Eureka. It does not grow as large, or produce as many large ears, yet it will produce a large tonnage. The grain is in the pulpy stage early in September.

SMOKY DENT

This is one of the newest corns on the market. It is called the earliest dent corn in cultivation. We agree with our grower that this variety is noted for its beautiful color. It is a good yielder, grows strong and quickly. The stalks are often 8 feet high. It will mature in New York, Vermont, Maine and Canada in about 80 days.

90 DAY GOLDEN DENT

This is one of the oldest varieties that we handle. It has been a general favorite with our trade for the past twenty-odd years. The stalks grow to a fair size, producing a good number of large handsome ears, well filled with kernels of a peculiar bronze color. This is the genuine 90 Day Golden Dent. Be sure that you buy your seed from us.

THEPAGE EARLY DENT

(A wonderful corn for Ensilage) the best of our recent introductions. A distinct cross between a yellow and a white dent. The grain is light yellow usually showing a white cap, produced both on red and white cobs. The grains are medium length indicating earliness, are rich in protein, and produced on ears 8 to 10 inches long. Stalks grow larger, more leafy, and will produce more tons to the acre than any other early variety of which we know. This variety from experiments made, is well adapted to sections in high altitudes and short growing seasons.

NEW YORK STATE FLINT

A variety much used in the Empire State. Stalk 7 to 9 feet high, usually 2 ears, 8 to 12 inches long. Gives excellent results.

Handy Reference Table

NAME	Average No. of seeds in one ounce.	Average wt. of one qt.	Seed required for 100 ft. of drill.	Average time required for seed to germinate.
Asparagus	1000	32 oz.	1 oz.	6-8 days

Melon, Water	225	16 oz.	1 oz.	6-10 days
Okra	425	20 oz.	2 oz.	7-14 days
Onion	12500	16 oz.	1 oz.	6-10 days
Parsley	17500	12 oz.	½ oz.	20-30 days
Parsnip	2800	10 oz.	½ oz.	7-14 days
Peas	50-180	30 oz.	1 qt.	6-8 days
Pepper	4000	16 oz.	½ oz.	9-14 days
Pumpkin	100	9 oz.	1 oz.	6-10 days
Radish	5000	24 oz.	1 oz.	3-6 days
Salsify	4500	12 oz.	1 oz.	7-14 days
Spinach	3000	14 oz.	1 oz.	6-10 days
Squash, Summer	300	20 oz.	1 oz.	6-10 days
Squash, Winter	125	14 oz.	1 oz.	6-10 days
Tomato	7500	10 oz.	⅓ oz.	7-14 days
Turnip	10000	24 oz.	1 oz.	4-6 days

Note—The above figures are subject to changes under varying conditions of growth, harvest and storage.

The manner of planting, soil and climatic conditions, will materially affect the period of germination.

THE PAGE SEED CO., Greene, N. Y.

SEED OATS

Page's "Marvel"

High in Purity
Strong in Vitality

The white grains are large, thick and plump, with but little fiber, or nearly all meat.

The heads are upright and bushy or "tree" form, supported by a strong straw of remarkable root development enabling them to resist drought better than most sorts, with less liability to lodge.

They are remarkable in their resistance to rust.

See Page 28

Japanese Millet

The most valuable of all the Millets. Great for green fodder, hay or ensilage.

Ordinary soil produces from 15 to 20 tons of green fodder per acre.

See Page 28
